01 ABOUT ME

Hello! my name is

Mohammed Alghamdi

I'm a Graphic Designer with a Computer Science background, focused on branding, marketing visuals, and structured design systems, with supporting experience in UI/UX.

I've worked on social media content, packaging, and large scale product catalogs, with a strong emphasis on consistency, clarity, and visual hierarchy.

I'm interested in building effective design systems and continuing to grow across both visual and digital design.

ΔTΔR

02

Attar is a brand specializing in air diffusers and essential oils.

My role was Graphic Designer and Social Media Manager, creating social media content, packaging, brochures, and company profiles, with a focus on consistency and clear visual communication across all brand materials.

البرونزية
BRONZE

03

Saudi Bronze is a company specializing in building materials and construction tools.

I'm working as a Graphic Designer and Photographer, initially creating social media content and marketing visuals before shifting my focus to the design of a large scale product catalog featuring over 1000 items.

The product catalog is centered on building a structured and scalable layout system to present product information clearly and consistently across more than 80 pages (so far).

Almost each section has it's unique layout playing around the different tools, leaning more towards a diverse visual representation instead of repeating pages.

RPMA

RPMA (Rental Property Management Application) is a mobile application designed to improve communication between landlords and tenants.

The app provides dedicated experiences for both sides, allowing landlords to manage properties and track tenant needs, while tenants can easily submit maintenance requests and communicate directly through messaging.
